The Physical Therapy Industry Has a Delivery Problem

1 | Delivery of physical therapy difficult and expensive to scale; 1-on-1, in-office treatments

2 | Declining insurance reimbursements and increased costs

3 | Profits decreasing by 27% since 2006 due to growth constraints/costs

What if physical therapy practices had a way to scale profitably using a technology platform that could help them grow beyond the limits of the typical physical therapy practice?

1. Disrupt the \$30B physical therapy industry
2. Penetrate the growing \$8B corporate wellness market
3. Re-define the way medicine is delivered

The Phzio Solution: A New Physical Therapy Delivery System

Phzio

- SaaS technology platform solution for providers bundling rehabilitation services and employer wellness programs
- First real-time remote monitored 1-to-many physical therapy treatment platform for home use
- Ability for physical therapists to observe multiple patients simultaneously in real-time
- Solves what has been a structural problem and limitation in post-acute care practice growth

A circular timer in the top right corner of the video frame indicates 00:41. Below the video, a progress bar shows 35:29. In the top left corner, there is a small profile card for Aaron Page, DPT, with a 'Send Message' button. In the top right corner, there is an 'Actions' dropdown menu. On the right side of the interface, there are two smaller video windows: the top one shows a female patient in a red shirt performing a side plank, and the bottom one shows PT Aaron Page wearing a headset and glasses, monitoring the session. At the bottom left, the eWellness Healthcare logo is visible. At the bottom right, a text box states: 'eWellness PT Aaron remotely monitoring his patients real-time in his office'.
