LIFELLOGGER TECHNOLOGIES CORP.
(A Development Stage Company)
March 31, 2014 and 2013
Notes to the Financial Statements
(Unaudited)

Note 1 – organization and operations

Lifelogger Technologies Corp. (the “Company”) was incorporated under the laws of the State of Nevada on June 4, 2012 under the name Lifelogger Technologies Corp. We changed our name effective as of January 31, 2014 in connection with our plans to develop and commercialization a lifelogging camera that involves the process of tracking and sharing personal data. Prior to January 31, 2014 we were engaged in providing a full range of web based marketing services, including web marketing services, social and viral marketing campaigns, search engine optimization consulting, custom web design, website usability consulting and web analytics implementation.

Effective as of January 31, 2014, the Company (i) amended and restated its articles of incorporation to (1) increase the number of authorized shares of common stock from 75,000,000 to 120,000,000, (2) create a class of preferred stock consisting of 5,000,000 shares, the designations and attributes of which were left for future determination by the Company’s board of directors and (ii) effectuated a 10 for 1 stock split of the Company’s issued and outstanding common stock (the “Forward Stock Split”).

Note 2 – summary of significant accounting policies

Basis of Presentation – Unaudited Interim Financial Information

The accompanying unaudited interim financial statements and related notes have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information, and with the rules and regulations of the United States Securities and Exchange Commission (“SEC”) to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. The unaudited interim financial statements furnished reflect all adjustments (consisting of normal recurring accruals) which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented. Unaudited interim results are not necessarily indicative of the results for the full fiscal year. These unaudited interim consolidated financial statements should be read in conjunction with the financial statements of the Company for the year ended December 31, 2013 and notes thereto contained in the information as part of the Company’s Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on April 9, 2014.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Critical accounting estimates are estimates for which (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material. The Company’s critical accounting estimates and assumptions affecting the financial statements were:

- (i) *Allowance for doubtful accounts:* Management’s estimate of the allowance for doubtful accounts is based on historical sales, historical loss levels, and an analysis of the collectability of individual accounts; and general economic conditions that may affect a client’s ability to pay. The Company evaluated the key factors and assumptions used to develop the allowance in determining that it is reasonable in relation to the financial statements taken as a whole.
- (ii) *Valuation allowance for deferred tax assets:* Management assumes that the realization of the Company’s net deferred tax assets resulting from its net operating loss (“NOL”) carry-forwards for Federal income tax purposes that may be offset against future taxable income was not considered more likely than not and accordingly, the potential tax benefits of the net loss carry-forwards are offset by a full valuation allowance. Management made this assumption based on (a) the Company has incurred recurring losses, (b) general economic conditions, and (c) its ability to raise additional funds to support its daily operations by way of a public or private offering, among other factors.

These significant accounting estimates or assumptions bear the risk of change due to the fact that there are uncertainties attached to these estimates or assumptions, and certain estimates or assumptions are difficult to measure or value.

Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable in relation to the financial statements taken as a whole under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Management regularly evaluates the key factors and assumptions used to develop the estimates utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such evaluations, if deemed appropriate, those estimates are adjusted accordingly.

Actual results could differ from those estimates.

Development Stage Company

The Company is a development stage company as defined by section 915-10-20 of the FASB Accounting Standards Codification. Although the Company has recognized nominal amounts of revenue, it is still devoting substantially all of its efforts on establishing the business. All losses accumulated since inception has been considered as part of the Company's development stage activities.

Fair Value of Financial Instruments

The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and paragraph 820-10-35-37 of the FASB Accounting Standards Codification ("Paragraph 820-10-35-37") to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America (U.S. GAAP), and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three (3) broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three (3) levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

Level 1 Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.

Level 2 Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.

Level 3 Pricing inputs that are generally observable inputs and not corroborated by market data.

Financial assets are considered Level 3 when their fair values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. If the inputs used to measure the financial assets and liabilities fall within more than one level described above, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument.

The carrying amount of the Company's financial assets and liabilities, such as cash, prepaid expenses, accounts payable and accrued expenses and accrued compensation - officers, approximate their fair value because of the short maturity of those instruments.

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis, as the requisite conditions of competitive, free-market dealings may not exist. Representations about transactions with related parties, if made, shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated.

Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less to be cash and cash equivalents.

Related Parties

The Company follows subtopic 850-10 of the FASB Accounting Standards Codification for the identification of related parties and disclosure of related party transactions.

Pursuant to Section 850-10-20 the Related parties include: a. affiliates of the Company; b. entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825-10-15, to be accounted for by the equity method by the investing entity; c. trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; d. principal owners of the Company; e. management of the Company; f. other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests; and g. other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

The financial statements shall include disclosures of material related party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. However, disclosure of transactions that are eliminated in the preparation of financial statements is not required in those statements. The disclosures shall include: a. the nature of the relationship(s) involved; b. a description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which income statements are presented, and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements; c. the dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change in the method of establishing the terms from that used in the preceding period; and d. a amounts due from or to related parties as of the date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the guarantees would be disclosed. Management does not believe, based upon information available at this time, that these matters will have a material adverse effect on the Company's financial position, results of operations or cash flows. However, there is no assurance that such matters will not materially and adversely affect the Company's business, financial position, and results of operations or cash flows.

Revenue Recognition

The Company applies paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

The Company derives its revenues from sales contracts with its customer with revenues being generated upon rendering of services. Persuasive evidence of an arrangement is demonstrated via invoice; service is considered provided when the service is delivered to the customers; and the sales price to the customer is fixed upon acceptance of the purchase order and there is no separate sales rebate, discount, or volume incentive.

Income Tax Provision

The Company accounts for income taxes under Section 740-10-30 of the FASB Accounting Standards Codification, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statements of operations in the period that includes the enactment date.

The Company adopted the provisions of paragraph 740-10-25-13 of the FASB Accounting Standards Codification. Paragraph 740-10-25-13 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under paragraph 740-10-25-13, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Paragraph 740-10-25-13 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

The estimated future tax effects of temporary differences between the tax basis of assets and liabilities are reported in the accompanying balance sheets, as well as tax credit carry-backs and carry-forwards. The Company periodically reviews the recoverability of deferred tax assets recorded on its balance sheets and provides valuation allowances as management deems necessary.

Management makes judgments as to the interpretation of the tax laws that might be challenged upon an audit and cause changes to previous estimates of tax liability. In addition, the Company operates within multiple taxing jurisdictions and is subject to audit in these jurisdictions. In management's opinion, adequate provisions for income taxes have been made for all years. If actual taxable income by tax jurisdiction varies from estimates, additional allowances or reversals of reserves may be necessary.

Uncertain Tax Positions

The Company did not take any uncertain tax positions and had no unrecognized tax liabilities or benefits in accordance with the provisions of Section 740-10-25 for the reporting period ended March 31, 2014 or 2013.

Net Income (Loss) Per Common Share

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through contingent shares issuance arrangement, stock options or warrants.

There were no potentially dilutive shares outstanding for the reporting period ended March 31, 2014 or 2013.

Cash Flows Reporting

The Company adopted paragraph 230-10-45-24 of the FASB Accounting Standards Codification for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category, and uses the indirect or reconciliation method ("Indirect method") as defined by paragraph 230-10-45-25 of the FASB Accounting Standards Codification to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments. The Company reports the reporting currency equivalent of foreign currency cash flows, using the current exchange rate at the time of the cash flows and the effect of exchange rate changes on cash held in foreign currencies is reported as a separate item in the reconciliation of beginning and ending balances of cash and cash equivalents and separately provides information about investing and financing activities not resulting in cash receipts or payments in the period pursuant to paragraph 830-230-45-1 of the FASB Accounting Standards Codification.

Subsequent Events

The Company follows the guidance in Section 855-10-50 of the FASB Accounting Standards Codification for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued. Pursuant to ASU 2010-09 of the FASB Accounting Standards Codification, the Company as an SEC filer considers its financial statements issued when they are widely distributed to users, such as through filing them on EDGAR.

Recently issued accounting pronouncements

In July 2013, the FASB issued ASU No. 2013-11, *Income Tax (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*. This ASU provides guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. An unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013.

In April 2014, the FASB issued ASU No. 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*. The amendments in this Update change the requirements for reporting discontinued operations in Subtopic 205-20.

Under the new guidance, a discontinued operation is defined as a disposal of a component or group of components that is disposed of or is classified as held for sale and “represents a strategic shift that has (or will have) a major effect on an entity’s operations and financial results.” The ASU states that a strategic shift could include a disposal of (i) a major geographical area of operations, (ii) a major line of business, (iii) a major equity method investment, or (iv) other major parts of an entity. Although “major” is not defined, the standard provides examples of when a disposal qualifies as a discontinued operation.

The ASU also requires additional disclosures about discontinued operations that will provide more information about the assets, liabilities, income and expenses of discontinued operations. In addition, the ASU requires disclosure of the pre-tax profit or loss attributable to a disposal of an individually significant component of an entity that does not qualify for discontinued operations presentation in the financial statements.

The ASU is effective for public business entities for annual periods beginning on or after December 15, 2014, and interim periods within those years.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying financial statements.

Note 3 – Going Concern

The financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates continuity of operations, realization of assets, and liquidation of liabilities in the normal course of business.

As reflected in the financial statements, the Company had a deficit accumulated during the development stage at March 31, 2014, a net loss and net cash used in operating activities for the reporting period then ended. These factors raise substantial doubt about the Company’s ability to continue as a going concern.

While the Company is attempting to generate sufficient revenues, the Company’s cash position may not be sufficient enough to support the Company’s daily operations. Management intends to raise additional funds by way of a public or private offering. Management believes that the actions presently being taken to further implement its business plan and generate sufficient revenues provide the opportunity for the Company to continue as a going concern. While the Company believes in the viability of its strategy to generate sufficient revenues and in its ability to raise additional funds, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent upon the Company’s ability to further implement its business plan and generate sufficient revenues.

The financial statements do not include any adjustments related to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary if the Company is unable to continue as a going concern.

Note 4 – Related Party Transactions

Advances from Former Stockholders

From time to time, the former President and Chief Executive Officer and stockholders of the Company provided advances to the Company for its working capital purposes. Those advances bore no interest and were due on demand.

The former President and stockholder of the Company advanced \$7,977 to the Company for the period from January 1, 2013 through December 20, 2013, the date of change in control and the Company did not make any repayment toward these advances.

Forgiveness of Advances from Former Stockholders and Accrued Compensation – Former Officers

On December 20, 2013, pursuant to the terms of the Stock Purchase Agreements, the former President and stockholders forgave advances of \$7,977 and accrued compensation of \$10,400, respectively or \$18,377 in aggregate. This amount was recorded as contributions to capital.

Note 5 – Stockholders’ Equity

Shares Authorized

Upon formation the total number of shares of all classes of stock which the Company is authorized to issue is seventy-five million (75,000,000) shares of common stock, par value \$.001 per share.

In January 2014, effective upon the filing of an amendment to the Article of Incorporation of the Company with the Nevada Secretary of State, the Company increased its authorized share capital to 125,000,000 shares consisting of 120,000,000 shares of common stock, par value \$0.001 per share and 5,000,000 shares of preferred stock, par value \$0.001 per share and effectuated a 10 for 1 stock split of the Company issued and outstanding common stock.

All shares and per share amounts in the financial statements have been adjusted to give retroactive effect to the one-for-ten (1:10) Forward Stock Split.

Common Stock

During the month of December 2012, the Company sold 50,000,000 shares of its common stock to its directors for \$5,000 in cash.

During June, 2013, the Company sold 31,000,000 shares of its common stock at \$0.001 per share for \$31,000 in cash.

Note 6 – Subsequent Events

The Company has evaluated all events that occurred after the balance sheet date through the date when the financial statements were issued to determine if they must be reported. The Management of the Company determined that there were no reportable subsequent events to be disclosed.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The Securities and Exchange Commission encourages companies to disclose forward-looking information so that investors can better understand a company's future prospects and make informed investment decisions. This report and other written and oral statements that we make from time to time contain such forward-looking statements that set out anticipated results based on management's plans and assumptions regarding future events or performance. We have tried, wherever possible, to identify such statements by using words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will" and similar expressions in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, future performance or results of current and anticipated sales efforts, expenses, the outcome of contingencies, such as legal proceedings, and financial results. Factors that could cause our actual results of operations and financial condition to differ materially are discussed in greater detail under Item 1A – "Risk Factors" of our Annual Report of Form 10-K for the year ended December 31, 2013.

We caution that the factors described herein and other factors could cause our actual results of operations and financial condition to differ materially from those expressed in any forward-looking statements we make and that investors should not place undue reliance on any such forward-looking statements. Further, any forward-looking statement speaks only as of the date on which such statement is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of anticipated or unanticipated events or circumstances. New factors emerge from time to time, and it is not possible for us to predict all of such factors. Further, we cannot assess the impact of each such factor on our results of operations or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Overview of Our Performance

During the three month period ended March 31, 2014 we focused our operations on the development of the lifelogging camera. We have developed a conceptual design and have developed the software to support the camera. We have contacted manufacturers and should shortly begin the manufacturing process. We have launched a web-based marketing campaign on kickstarter.com to promote presales of our lifelogging video camera and processing software. We are seeking a minimum of \$150,000 in pledges for this campaign by July 1, 2014. During the quarter we have delivered a prototype design to a company and have successfully earned revenue from this deliverable. We changed our name effective January 31, 2014 in connection with our plans to diversify our business through the development and commercialization of a lifelogging camera that involves the process of tracking and sharing personal data.

Lifelogging is a form of social networking that involves the process of tracking and sharing personal data. It is the principle of having a wearable device that can either take video or still pictures of a user's activities automatically or on command. We have developed a prototype Lifelogger Camera and sophisticated software tools that enable the user to store, recall and share audio and videos of their life experiences. The production version of the Lifelogger Camera, when completed, will be a miniature digital video camera that can be clipped on the user's ear, glasses or hat. It will have one-touch controls accessible from Android, IOS and Windows based applications (or APPs). The Lifelogger Camera will have the ability to electronically link to a cloud-based data service that will be capable of seamlessly and effortlessly processing and organizing the users video and captured data based on the users preferences.

We expect to launch sales to the public of our Lifelogger Camera in the fourth quarter of fiscal 2014.

RESULTS OF OPERATIONS

The following comparative analysis on results of operations was based primarily on the comparative audited financial statements, footnotes and related information for the periods identified below and should be read in conjunction with the financial statements and the notes to those statements that are included elsewhere in this report.

Revenue

Total revenue increased \$79,400 to \$87,000 during the three month period ended March 31, 2014 compared to \$7,600 in the three month period ended March 31, 2013. This increase in total revenue is due to the conceptual design and sale of a wearable video camera.

Our cost of goods sold for the three month period ended March 31, 2014 increased by approximately \$37,017 compared to the three month period ended March 31, 2013 primarily as a result of the costs attributed to the design of the camera. Our gross margins decreased 29% due to the Company changing their business from a consulting based revenue to the manufacture of a camera. We are unable to predict what our expected gross profits will be in fiscal 2014 as we have not established a sales price for our lifelogger camera nor do we have definitive production costs.

Total operating expenses for the three month period ended March 31, 2014 increased by \$58,845 compared to the three month period ended March 31, 2013 primarily as a result of an increase in professional and consulting fees and other general operating expenses. We expect increases in our operating expenses as we ramp up our Lifelogging Camera business.

The net loss for the three month period ended March 31, 2014 was \$26,636, an increase of \$16,006 compared to the three month period ended March 31, 2013, primarily as a result of an increases in operating expenses, partially offset by an increase in revenue as discussed above.

Liquidity and Capital Resources

Liquidity is the ability of an enterprise to generate adequate amounts of cash to meet its needs for cash requirements. As of March 31, 2014 our working capital amounted to (\$26,625), a decrease of \$24,636 as compared to (\$1,989) as of December 31, 2013. This decrease is primarily a result of an increase in accounts payable and accrued expenses. Working Capital included primarily cash of \$18,978 and prepaid expenses of \$9,000.

Net cash provided by operating activities was \$18,723 during the three month period ended March 31, 2014 compared to net cash used in operating activities of \$6,522 in the three month period ended March 31, 2013. The increase in cash provided by operating activities is primarily attributable to an increase in accounts payable and accruals.

We do not have sufficient resources to effectuate our business plan. We expect to incur a minimum of \$971,000 in expenses during the next twelve months of operations. We estimate that this will be comprised of approximately \$578,000 towards development and marketing of the Lifelogger Camera, \$192,000 towards salaries and subcontractors, \$100,000 towards marketing materials and sales. Additionally, approximately \$101,000 will be needed for general overhead expenses such as for corporate legal and accounting fees, office overhead and general working capital. Accordingly, we will have to raise the funds to pay for these expenses. We potentially will have to issue debt or equity or enter into a strategic arrangement with a third party.

There can be no assurance that additional capital will be available to us. We currently have no agreements, arrangements or understandings with any person to obtain funds through bank loans, lines of credit or any other sources. Since we have no other such arrangements or plans currently in effect, our inability to raise funds for the above purposes will have a severe negative impact on our ability to remain a viable company. We have launched a web-based marketing campaign on kickstarter.com to promote presales of our lifelogging video camera and processing software. We are seeking a minimum of \$150,000 in pledges for this campaign by July 1, 2014. While the response to our presale campaign has been favorable with pledges of just over \$55,000 as of the date of this report, there is no assurance we will meet our minimum target of \$150,000. If we meet our minimum target amount and ship the cameras to the buyers, we will recognize the revenue from these sales.

Going Concern Consideration

We have been in the development stage since our inception on June 4, 2012 and continue to incur significant losses. We had a net loss during the period ended March 31, 2014 of \$24,636 and for the period from inception through March 31, 2014 \$81,002. This raises substantial doubt about our ability to continue as a going concern. Our ability to continue as a going concern is dependent our ability to raise additional capital and generate additional revenues and profits from our business plan.

In the opinion of our independent registered public accounting firm for our fiscal year end December 31, 2013, our auditor included a statement that as a result of our deficit accumulated during the development stage at December 31, 2013, our net loss and net cash used in operating activities for the reporting period then ended, there is a substantial doubt as our ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Inflation

In the opinion of management, inflation has not and will not have a material effect on our operations in the immediate future. Management will continue to monitor inflation and evaluate the possible future effects of inflation on our business and operations.

Off-Balance Sheet Arrangements

Under SEC regulations, we are required to disclose our off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, such as changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. As of March 31, 2014 we have no off-balance sheet arrangements.

CRITICAL ACCOUNTING POLICIES

Our significant accounting policies are disclosed in Note 2 of our Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and are not required to provide the information required under this item.

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act") that are designed to ensure that information required to be disclosed by us in reports that we file under the Exchange Act is recorded, processed, summarized and reported as specified in the SEC's rules and forms and that such information required to be disclosed by us in reports that we file under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer, or CEO, and our Chief Financial Officer, CFO, to allow timely decisions regarding required disclosure. Management, with the participation of our CEO and CFO, performed an evaluation of the effectiveness of our disclosure controls and procedures as of March 31, 2014. Based on that evaluation, our management, including our CEO and CFO, concluded that our disclosure controls and procedures were effective as of March 31, 2014.

Our management, including our Chief Executive Officer and our Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected.

Changes in Internal Control

There were no changes identified in connection with our internal control over financial reporting during the three months ended March 31, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Currently we are not involved in any pending litigation or legal proceeding.

ITEM 1A. RISK FACTORS.

We are a smaller reporting company as defined by Rule 12b-2 of the Securities Exchange Act of 1934 and are not required to provide the information under this item.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS

The following documents are filed as a part of this report or are incorporated by reference to previous filings, if so indicated:

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

LIFELLOGGER TECHNOLOGIES CORP.

Dated: May 20, 2014

By: /s/ Stewart Garner

Stewart Garner

Chief Executive Officer (Principal Executive Officer and Principal
Financial and Accounting Officer)

**CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE
SARBANES-OXLEY ACT OF 2002**

I, Stewart Garner, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarterly period ended March 31, 2014 of Lifelogger Technologies Corp. (the “registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting;
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.
