**New PEN Inc. surface cleaning product to redefine personal health and safety
Entry planned into \$50 billion global cleaning market**

February 3, 2015 – Deerfield Beach, FL – In direct response to the apparent failure of current cleaners and disinfectants to prevent the spread of illness, PEN Inc. (OTCQB: PENC) is developing a new category of cleaning products intended to clean and fortify surfaces at the nanoscale-level. Unlike traditional harsh pesticide-containing disinfectants, PEN products will incorporate natural elements and sustainable chemistry to keep surfaces safe. The company's aim is to revolutionize the \$50 billion global market for industrial and institutional cleaning, which includes lodging, retail outlets, and workplaces. The product is also ideal for the \$80 billion global household cleaning market.

“The news is filled with stories of people being sickened on cruise ship vacations, amusement park visits, and at other public venues,” noted Scott E. Rickert, PEN’s Chairman, President and CEO. “This PEN product aims to redefine personal health and safety, so consumers can stop worrying about germs and disease every time they touch a restaurant table, airplane armrest, bank ATM machine, or hotel room door.” Dr. Rickert added, “Just as important, the patent-pending product will use only safe, sustainable ingredients – no pesticides or harsh chemicals. In fact the primary ingredient, as listed on the label, is a food additive.”

Dr. Rickert also addressed the market opportunity. “I expect PEN’s first product to expand into a family of products to tackle the problem of safe, healthy surfaces, worldwide. My vision for PEN is to harness the vast potential of nanotechnology to create innovative, breakthrough products for a global marketplace. In PEN we have both the R&D expertise and the commercialization experience to begin the process of bringing this product to market.”

About PEN Inc. (OTCQB: PENC)

PEN Inc. (PENC) is a global leader in developing, commercializing and marketing enhanced-performance products enabled by nanotechnology. The company focuses on innovative and advanced product solutions in safety, health and sustainability. For more information about PEN Inc, visit www.pen-technology.com.
